Service Category	Interface Type (CCITT recom- mended)	Service Requirements		Data Rate	Public Telecommunications Operators		
					BT	**Hull**	**MCL**
2	X.21bis	Electrical: V.35	Physical: ISO 2593, BS 6623: part 4, 1986	48 Kbits/s 56 Kbits/s 64 Kbits/s	Yes Yes No	Yes No No	Yes Yes Yes
		Approved adapter cable: BC19F–02 (2 feet) Approved extension cable: BC19L–25 (25 feet)					

BT   –   British Telecommunications, plc
Hull   –   Kingston Communications (Hull), plc
MCL   –   Mercury Communications, Ltd.

Power Rating

The user must ensure that the power drawn by the DEC WANcontroller 622, together with the host and other auxiliary apparatus drawing power from the host, is within the rating of the host power supply. Digital has designed all permutations of the host configuration to operate within the limits of the host power rating.

The module power rating is:

    5 V   at   2.5 A
  12 V   at   0.1 A
–12 V   at   0.1 A

Notes

- The total length of cable used must not exceed 27 feet.
- Only use cables that have been approved for the DECNIS. You can use other approved cables if they conform to NS/G/1235/100009 and any other special requirements.
