Ce produit ou document est protégé par un copyright et distribué avec des licences qui en restreignent l'utilisation, la copie, la distribution, et la décompilation. Aucune partie de ce produit ou document ne peut être reproduite sous aucune forme, par quelque moyen que ce soit, sans l'autorisation préalable et écrite de Sun et de ses bailleurs de licence, s'il y en a. Le logiciel détenu par des tiers, et qui comprend la technologie relative aux polices de caractères, est protégé par un copyright et licencié par des fournisseurs de Sun.

Des parties de ce produit pourront être dérivées des systèmes Berkeley BSD licenciés par l'Université de Californie. UNIX est une marque déposée aux Etats-Unis et dans d'autres pays et licenciée exclusivement par X/Open Company, Ltd.

Sun, Sun Microsystems, le logo Sun, AnswerBook2, docs.sun.com, Sun Enterprise, et Solaris sont des marques de fabrique ou des marques déposées, ou marques de service, de Sun Microsystems, Inc. aux Etats-Unis et dans d'autres pays. Toutes les marques SPARC sont utilisées sous licence et sont des marques de fabrique ou des marques déposées de SPARC International, Inc. aux Etats-Unis et dans d'autres pays. Les produits portant les marques SPARC sont basés sur une architecture développée par Sun Microsystems, Inc.

L'interface d'utilisation graphique OPEN LOOK et Sun™ a été développée par Sun Microsystems, Inc. pour ses utilisateurs et licenciés. Sun reconnaît les efforts de pionniers de Xerox pour la recherche et le développement du concept des interfaces d'utilisation visuelle ou graphique pour l'industrie de l'informatique. Sun détient une licence non exclusive de Xerox sur l'interface d'utilisation graphique Xerox, cette licence couvrant également les licenciés de Sun qui mettent en place l'interface d'utilisation graphique OPEN LOOK et qui en outre se conforment aux licences écrites de Sun.

CETTE PUBLICATION EST FOURNIE "EN L'ETAT" ET AUCUNE GARANTIE, EXPRESSE OU IMPLICITE, N'EST ACCORDEE, Y COMPRIS DES GARANTIES CONCERNANT LA VALEUR MARCHANDE, L'APTITUDE DE LA PUBLICATION A REpondRE A UNE UTILISATION PARTICULIERE, OU LE FAIT QU'ELLE NE SOIT PAS CONTREFAISANTE DE PRODUIT DE TIERS. CE DENI DE GARANTIE NE S'APPLIQUERAIT PAS, DANS LA MESURE OU IL SERAIT TENU JURIDIQUEMENT NUL ET NON AVENU.

Dual Grid Power Option Diagnostics and Service

Use the following troubleshooting procedures to solve problems that may be encountered after the dual grid power option installation procedures are complete.

Power Supply or ACIM

If one or more power supplies not serviced by the same AC Input Module (ACIM) indicate red or gray on Hostview, then check for one or more failed power supplies. If two power supplies serviced by the same ACIM indicate red or gray on Hostview, then check for a failed ACIM.

▼ To Check for a Failed Power Supply

1. **Make sure power supply is turned on at ACIM.**
2. **Make sure power supply LEDs are green.**
3. **Make sure cables are connected correctly.**
4. **Make sure control board voltages are in correct range (green) in Hostview.**

If the power supply still indicates a failure, then the ACIM may be at fault.

▼ To Check for a Failed ACIM

1. **Make sure power supplies are turned on at ACIM.**
2. **Replace the ACIM.**

3. Replace the status cable. (Requires shutdown of Sun Enterprise™ 10000.)

Faulty Status Module

The status module tray assembly is a component of the dual power grid installation option. There are four status modules in the tray assembly located in the front 4U panel (FIGURE 1) or (FIGURE 2).

▼ To Determine Which Status Module Is at Fault

- **Check that the SSP version installed supports the dual power grid installation.**

A faulty status module is determined by which combination of power supplies are red or gray in Hostview.

Note – Four status modules in the Status Module Tray Assembly are numbered 0 to 3 from top to bottom.

TABLE 1 Determine a Faulty Status Module

Status Module	Power Supply Combinations Indicating Red or Gray
0	0, 1, 8, 9
1	2, 3, 10, 11
2	4, 5, 12, 13
3	6, 7, 14, 15

▼ To Remove and Install the Status Module

1. **Remove the faulty status module from the status module tray assembly.**
2. **Install a new status module.**
3. **Make sure all switches and circuit breakers are on.**
4. **Make sure that the ACIM DC on LEDs are green and all others are amber.**

5. Verify that the Hostview display on the SSP indicates green for the control boards and green for the power supplies.
