# Sun Fire™ Link Assembly Installation Guide for Sun Fire 15K/12K Systems

This doclette provides instructions for installing a Sun Fire Link assembly in a Sun Fire 6800 chassis.

Complete documentation for the Sun Fire Link interconnect product is available in two formats:

- In a printed version, which you can order (part number, X4190A)
- In Adobe Acrobat Exchange (.pdf) format on the Sun Fire Link CD. The CD ships with:
  - Sun Fire Link Assembly (Sun Fire 6800 system)
  - Sun Fire Link Assembly (Sun Fire 15K/12K system)

  To read the documentation online, use the CD-ROM drive on the workstation that serves as your administration station.

Installing a Sun Fire Link Assembly

These instructions are for use by trained service representatives who have been trained on Sun Fire Link interconnect hardware, and who have previously installed a Sun Fire Link assembly in the field. They are not complete instructions; they lack illustrations and precautions.

Note – These instructions are intended only as a reminder for those who have previous experience with this procedure. See the Sun Fire Link Hardware Installation Guide for more detailed instructions.

---

1. **Attach an ESD wrist strap or foot strap, and connect the strap to the system. Place an ESD mat close to the system.**

⚠ **Caution –** You must install an assembly within one minute of removing the filler panels.

---

2. **Remove a filler panel, if one is installed in the slot.**

3. **Hold the assembly by the front handle with one hand, while supporting the bottom with your other hand, and position the board onto the carrier rail.**

4. **With the ejector lever extended, slide the assembly into the slot until it connects with the expander connector.**

5. **Apply firm pressure to the face plate to properly seat the assembly with the expander connector.**

6. **Push the ejector lever downwards to fully seat the assembly.**

Accessing Sun Documentation Online

A broad selection of Sun system documentation is located at:
